Balaji Dasetti

Junior Full Stack Developer | Flutter & PHP | REST APIs | AWS | Docker | MySQL
https://github.com/Balaji431 | https://www.linkedin.com/in/balaji-d-1675a9324

PROFESSIONAL SUMMARY

Junior Full Stack Developer with hands-on experience developing, deploying, and maintaining production applications using Flutter (Web & Mobile), PHP 8.2 REST APIs, MySQL 8.0, Docker, and AWS. Currently working at VianaSoft Private Limited on VStay, a college-related platform, with responsibility spanning application development, AWS deployment, Google Play Store and Apple App Store releases, and ongoing production management. Previously completed a Full Stack Web Developer internship involving REST APIs, JWT authentication, Docker Compose, Firebase Cloud Messaging, and role-based access control. Oracle Certified Professional in AI Vector Search.

TECHNICAL SKILLS

Programming Languages: Dart, PHP 8.2, Java, JavaScript, C

Frontend Development: Flutter (Web & Mobile), React.js, HTML5, CSS3, Material Design, Responsive UI Design

Backend Development: PHP REST API, JWT Authentication, Apache HTTP Server, CORS Configuration, Custom XLSX Parsing (Zip Archive + SimpleXML)

Database: MySQL 8.0, PostgreSQL, Firebase Realtime Database, Room Database (Android), PDO, MySQLi

Frameworks & Libraries: Flutter SDK, Provider (State Management), Hive (Local NoSQL Cache), DataTable2, Firebase SDK

Developer Tools: Android Studio, VS Code, XAMPP, phpMyAdmin, Postman

DevOps & Deployment: AWS, Docker, Docker Compose, Nginx, Linux Cron Jobs, Apache mod_rewrite, PowerShell & Bash Scripting

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer

VianaSoft Private Limited | April 2026 – Present

VStay – College Accommodation Platform | vstay.saveetha.com

- Developed and maintained VStay (vstay.saveetha.com), a college-related web and mobile application used in a production environment.
- Handled AWS deployment of the application using the college/server infrastructure and supported its production operation.
- Managed deployment and release of the mobile application on both Google Play Store and Apple App Store.
- Currently manage and maintain the application after graduation, supporting ongoing production operations and application updates.

Full Stack Web Developer Intern

Smart Learned Tech | June 2025 – August 2025 (3 Months)

- Built responsive UI screens in Flutter and Dart for both web and mobile targets, following Material Design guidelines for layout consistency.
- Developed 15+ PHP 8.2 REST API endpoints covering authentication, hostel room management, fee tracking, and push notifications, with structured JSON responses and CORS configuration.
- Implemented JWT-based authentication covering token issuance and validation, with role-based access control (RBAC) for four user roles: Admin, Warden, Student, and Security.
- Containerized a three-service application using Docker Compose — Flutter Web served via Nginx, PHP backend via Apache, and MySQL database — enabling consistent local and production environments.
- Integrated Firebase Cloud Messaging (FCM) to send real-time push notifications to students, wardens, and administrators from the PHP backend.
- Used Git and GitHub for version control, maintaining feature branches and resolving merge conflicts across the development cycle.
- Tested API endpoints using Postman, debugged Flutter UI issues, and participated in deployment configuration including environment variables and container health checks.

PROJECTS

Mind Care – AI-Based Mental Wellness Platform

Java | Android Studio | Firebase Auth & Realtime DB | Room Database | REST APIs | Patent Filed

https://github.com/Balaji431

- Developed a full Android application in Java using Android Studio, integrating AI-based mental wellness assessment features with a Material Design interface.
- Implemented Firebase Authentication for user login and Firebase Realtime Database for real-time data sync across sessions.
- Integrated Room Database for local offline data storage, allowing the app to function without a continuous internet connection.
- Consumed REST APIs to fetch AI-generated wellness recommendations, parsing JSON responses and displaying dynamic content in the Android UI.

House Hunting – Responsive Property Search Web Application

HTML5 | CSS3 | JavaScript | Deployed on Neocities (Live Demo Available)

- Built a responsive property browsing web application using HTML5 and CSS3 Flexbox/Grid, ensuring consistent layout across desktop, tablet, and mobile screens.
- Added dynamic UI interactions using vanilla JavaScript — property search filters, smooth-scroll navigation, and interactive listing cards — without any external framework.
- Deployed the project to Neocities for public access and live demonstration.
- Applied consistent typography, spacing, and color contrast following standard UX best practices.

CERTIFICATIONS

- **Oracle AI Vector Search Certified Professional** – Oracle Corporation | Valid Through: March 12, 2027 | Credential ID: 101314134DB23AIOCP
- **Oracle AI Foundations Associate** – Oracle Corporation
- **Programming in Java** – NPTEL – National Programme on Technology Enhanced Learning
- **Generative AI Workshop** – Industry Certification
- **C Programming** – Simplilearn

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Saveetha School of Engineering, Chennai, India | 2022 – 2026 | CGPA: 8.45 / 10

Intermediate – Class XII

Chaitanya Junior College | 2020 – 2022 | CGPA: 9.0 / 10

Secondary School Certificate – Class X

Sri Sarada Vidya Mandir | 2020 | CGPA: 9.5 / 10

LANGUAGES

English (Professional Working Proficiency) | Telugu (Native) | Hindi (Conversational)
